Kalamazoo, Michigan

SUNDAY, MAY 19, 2019
East Lansing, Michigan

8 CEUS

Ncilaas C. Geurs, D.D.S., M.S., is Professor of Periodontology at the University of Alabama at Birmingham. He received his dental degree at ACTA (Free University of Amsterdam, The Netherlands) in 1992. He completed his training in Periodontology and Master’s in Clinical Dentistry at the University of Alabama at Birmingham from 1992-1995. He is a Diplomate of the American Board of Periodontology and a Fellow of the American College of Dentists. He is actively involved in teaching periodontology and implantology to both the dental students and post graduate students. He was the director of the advanced education program in Periodontology for 10 years and is currently the chair of the Department of Periodontology. His research interests include: periodontitis and systemic health; regeneration; bone grafting and dental implantology; He has published and lectured extensively on these topics. In 2016, Dr. Geurs received the “Endowed Professorship” from the University of Alabama in recognition of a full-time Periodontist who has a distinguished career in academics and has demonstrated a commitment to and excellence in the areas of teaching, research, and service.

Dr. Geurs has published numerous case reports and articles for various professional journals, including The International Journal of Periodontics and Restorative Dentistry, Journal of Periodontology and Clinical Advances in Periodontics. He has published a chapter on “Soft Tissue Consideration for Implant Site Development” for Oral and Maxillofacial Surgery Clinics of North America.

He is a nationally and internationally recognized speaker. Previous engagements include: AAP annual meetings in New Orleans and Philadelphia; Northeastern Society of Periodontists in NYC; 2010 Florida National Dental Convention; European Federation of Periodontology Conference in Geneva Switzerland; 2012 hands-on course on “Advanced Bone Grafting” in Manchester UK; Indian Society of Dental Research in Chennai India; and in April 2017, the Taiwanese Academy of Periodontology.

About The Speaker

Testimonials

One of the best seminars I’ve attended ~ S.V., RDH (Lancaster, PA)

Great delivery of info. Enjoyed the evidence based info ~ RDH (Las Vegas, NV)

Speaker was fabulous, lots of information, explained well, love the take home material ~ E.B., RDH (Tempe, AZ)

The information I have learned today was great & something that I can incorporate in my office ~ J.P., RDH (San Antonio, TX)

Dr. Geurs was excellent!! Well spent Saturday with him, Thank you! ~ L.V., DDS (Sacramento, CA)

Very personable, good speaker + very knowledgeable ~ M.H., DDS (Stockton, CA)

COMPREHENSIVE PERIODONTOLOGY FOR THE GENERAL PRACTICE

COURSE OUTLINE

I. Optimizing Your Patients’ Systemic Health Through Dental Care!
A. Periodontal Disease and Systemic Health: “What do we tell our patients”?
1. Pathogenesis of Periodontal disease
2. Microbial biofilms
3. The truth about flossing
B. Periodontal Infection, Inflammation and Systemic Health
1. Cardiovascular and stroke
2. Diabetes and inflammatory periodontal disease
3. Pregnancy and periodontal disease
a. Preterm birth
b. Treatment during pregnancy
C. Treatment of peri-implant disease

II. Long-Term Implant Success
A. Diagnosis of peri-implant diseases
B. Prevention of peri-implant diseases and Implant maintenance
C. Treatment of peri-implant disease

III. Open Discussion
Dr. Geurs’ presentation will use an interactive lecture format that will include a wide variety of clinical photographs to emphasize and demonstrate concepts. The seminar will discuss the latest in therapies to treat periodontal diseases and peri-implant diseases to optimize oral health and systemic health. There will be ample opportunity for Q & A following each section of the presentation and at the end of the session.

D. Systemic Health Through Dental Care!
The effects of periodontal infection and inflammation are not limited to the destruction of the periodontium. There is compelling evidence outlining its influence on systemic health. Our patients are increasingly seeking opportunities to improve to improve their health. This course will review current concepts of etiology and pathology of periodontal disease and the interface with systemic health with a focus on how we should educate our patients in 2019. The long-term relationship with our patients and our commitment to prevention in a dental practice present a unique opportunity to incorporate wellness concepts in our practices. Successful smoking cessation strategies will be discussed. The opioid abuse epidemic is gripping the country. The role of dentistry in this crisis will be discussed. This course will outline the latest innovations in periodontal treatment and prevention of periodontal disease. After completion of this course the participant will be able to implement these therapies in their dental practices to optimize the oral and periodontal health and improve the overall wellness of our patients.

Long-Term Implant Success
Dental implants have become the preferred option for the replacement of missing teeth. The maintenance of dental implants has become an important aspect of every dental practice and an important parameter for long term implant success. Peri-implant diseases are a very common finding and the management has proven to be challenging. This course will present the latest innovations in prevention and therapy in implant maintenance.

LEARNING OBJECTIVES

• Understand the systemic effects of periodontal infection and inflammation
• Use the current understanding and evidence to discuss the oral disease burden on systemic health
• Learn the latest concepts in periodontal therapy, anti microbial therapy and inflammation regulation
• Understand the Opioid abuse epidemic
• Learn how to diagnose peri-implant diseases
• Learn the risk factors and etiology for peri-implant diseases
• Learn how to prevent peri-implant diseases and the latest concepts in implant maintenance
• Learn how to manage and treat peri-implant disease
• Understand the surgical treatment of peri-implantitis
