COMPREHENSIVE PERIODONTOLOGY FOR THE GENERAL PRACTICE

Course Outline

I. Optimizing Your Patients’ Systemic Health Through Dental Care!

A. Periodontal Disease and Systemic Health: “What do we tell our patients”?
   1. Pathogenesis of Periodontal disease
   2. Microbial biofilms
   3. The truth about flossing

B. Periodontal Infection, Inflammation and Systemic Health
   1. Cardiovascular and stroke
   2. Diabetes and inflammatory periodontal disease
   3. Pregnancy and periodontal disease
   a. Preterm birth
   b. Treatment during pregnancy

II. Long-Term Implant Success

A. Diagnosis of peri-implant diseases
B. Prevention of peri-implant diseases and Implant maintenance
C. Treatment of peri-implant disease

III. Open Discussion

Dr. Geurs’ presentation will use an interactive lecture format that will include a wide variety of clinical photographs to emphasize and demonstrate concepts. The seminar will discuss the latest in therapies to treat periodontal diseases and peri-implant diseases to optimize oral health and systemic health. There will be ample opportunities for Q & A following each section of the presentation and at the end of the session.

Cost: $285

LATE FEE
Add $10/registrant if phoned, postmarked or faxed after: May 10, 2019.

Please note - Refund Policy

Full refund less a $50 non-refundable deposit per registrant with a written notice postmarked or faxed NO LATER than 5/10/19. No refund will be given after that date. A 2 year credit (with $50 administration fee) for another seminar will be issued in the name of the non-attending registrant.

Learning Objectives

- Understand the systemic effects of periodontal infection and inflammation
- Use the current understanding and evidence to discuss the oral diseases burden on systemic health
- Learn the latest concepts in periodontal therapy, anti microbial therapy and inflammation regulation
- Understand the Opioid abuse epidemic
- Learn how to diagnose peri-implant diseases
- Learn how to prevent peri-implant diseases and the latest concepts in implant maintenance
- Learn how to manage and treat peri-implant disease
- Understand the surgical treatment of peri-implantitis

Dental implants have become the preferred option for the replacement of missing teeth. The maintenance of dental implants has become an important aspect of every dental practice and a significant parameter for long term implant success. Peri-implant diseases are a very common finding and the management has proven to be challenging. This course will present the latest innovations in prevention and therapy in implant maintenance.
