Concord Dental & Medical Seminars, LLC announces a Continuing Education Course for the Entire Dental Team!

“HEALTH, SAFETY, PROTECTION AND INFECTION CONTROL IN THE DENTAL PRACTICE”
CURRENT STATUS 2019
with
JOHN A. MOLINARI, PH.D.

FRIDAY, DECEMBER 6, 2019
Baltimore, Maryland
SATURDAY, DECEMBER 7, 2019
Annapolis, Maryland

CURRENT UPDATE
Measles Outbreak

D r. John A. Molinari received a B.A. in Biology from St. Vincent College and a Ph.D. in Microbiology from the University of Pittsburgh School of Dental Medicine. He was awarded Professor Emeritus at the University of Detroit Mercy, where he served for 32 years in the School of Dentistry as Professor and Chairman of the Department of Biomedical Sciences and Director of Infection Control. Dr. Molinari was later Infection Control Director for THE DENTAL ADVISOR in Ann Arbor, Michigan from 2009-2018. He has published over 500 scientific articles, text chapters, and abstracts in the areas of microbiology and immunology, and lectures nationally and internationally on topics dealing with infectious diseases and infection control.

He is a founder and Past-President of OSAP, and is also co-author of the textbook, "Cottone's Practical Infection Control in Dentistry." He has served as a consultant for the CDC, ADA Council on Scientific Affairs, Council on Dental Practice, and regional hospitals. Dr. Molinari also served as Chairman of the State of Michigan Governor's Risk Reduction and AIDS Policy Commission. Previously, he was the Infection Control section editor for The Compendium of Continuing Education in Dentistry, a member of the Editorial Board for The Journal of the American Dental Association and contributed a monthly column for Dental Economics. In recognition of his efforts, Dr. Molinari was inducted as an honorary member of the Michigan Dental Association, the International College of Dentists, the American College of Dentists, and was a recipient of the ADA Golden Apple Award.

The speaker receives no support from any commercial organization and does not promote any commercial products or sell any tapes, books, instruments, forms or other materials for this course.

DAILY TUITION
$285 - Dentists
$185 - RDHs & Aux.
8:30 am - 5:00 pm course
Payment by check preferred.

INCLUDES
Continental breakfast, lunch, coffee break, afternoon dessert, bound course manual & certificate for 8 CEUs.* 8 CEUs are awarded based on attendance of entirety of lecture. Late arrival or early departure will result in adjustment of credits.

LATE FEE
Add $10/registrant if phoned, postmarked or faxed after:
Friday, November 29, 2019.

Refund Policy
Full refund less a $50 non-refundable deposit per registrant with a written notice postmarked or faxed NO LATER than:
Saturday, November 29, 2019.
No refund will be given after that date. A 2 year credit (with $50 administration fee) per registrant with a written notice postmarked or faxed after:
Monday-Friday
Nov. 29, 2019.

Special Needs / Requests for fee) for another seminar will be issued in the name of the non-attending registrant.

Seminar Locations
FRIDAY, DECEMBER 6, 2019
Hilton BWI Airport Hotel
1739 W. Nursery Road
Linthicum Heights, MD 21090
(410) 694-0808
Day of Parking: Complimentary. Use open lots.
Rooms: Ask for best available rate.

SATURDAY, DECEMBER 7, 2019
DoubleTree by Hilton Hotel Annapolis
210 Holiday Court
Annapolis, MD 21401
(410) 224-3150
Day of Parking: Complimentary. Use open lots.

Course Details

** STAFF TUITION (BPA & RDH only) $149 per course each ONLY when ordered & paid full price with deposit of $50

Let's Talk About Infection Control

This seminar will discuss the current infection control regulations and recommendations for dentistry. The most current CDC Guidelines for Infection Control in Dental Practice, along with accumulated data regarding health care risks, and preventive measures, will serve as frameworks for this presentation. Evidence-based information also will be discussed to address certain issues where perceptions and misuse of infection control procedures and products are in conflict with scientific and clinical knowledge. A major goal of this presentation is to help dental professionals increase their understanding of the ‘why’ as well as the ‘what’ of infection control practices.

The Challenges of Waterborne Infections: A Microbiology Perspective

Infections caused by waterborne microorganisms are among the most harmful to global health. These include diseases caused by a variety of bacteria, protozoa, viruses, and other parasites. They are able to proliferate in many natural water sources, as well as man-made systems designed to provide potable water for public and health care use. An initial overview of the principles and epidemiology associated with waterborne infections will be followed by discussion of representative, clinically important pathogens and the challenges they present to healthcare settings and the general population. With specific regard to dentistry, comprehensive infection prevention recommendations now address the potential for colonization and contamination of dental treatment water. Emphasis here will focus on current waterborne microbial challenges, including Pseudomonas, Legionella pneumophila, and nontuberculous Mycobacteria (NTM) species.

Vaccine Recommendations: Science, Success & Myths

This seminar will consider vaccination as an effective public health infection control approach for protection of both the general population and health care professionals. Emphasis will focus on the most recent updated information pertaining to vaccines used in the prevention of adult infectious disease, especially those with increased occupational health care risks. Discussion concerning recent public health vaccine recommendations, such as those targeting shingles and human papilloma virus (HPV) will also be included. The rationale and classification of available vaccines and emerging technologies will be discussed in order to provide participants appropriate scientific and clinical evidence, which can be useful when considering the necessity for their own protection, as well as protection of the general public and individuals diagnosed with immune compromising conditions and diseases. In addition, important information will be presented concerning certain public misperceptions against vaccines which threaten their documented global success against many preventable infectious diseases.

Dr. Molinar’s seminar will use a traditional PowerPoint lecture format that will include microbiological, research, and other evidence-based clinical information to demonstrate and reinforce concepts. The presentation will also encourage audience participation in the discussion of appropriate infection prevention strategies for clinical settings. Participants will have multiple opportunities to ask questions during the course of the seminar.

LEARNING OBJECTIVES

- Describe infectious disease characteristics and outbreaks of specific waterborne pathogens that challenge our health care infection control procedures.
- Discuss available approaches to control microbial colonization of waterlines in dental and medical settings.
- Comprehend the overall impact vaccinations have had in protecting the population against many infectious diseases.
- Discuss the latest CDC vaccine recommendations for health care professionals.
- Understand the rationale for other representative vaccine recommendations, including human papilloma virus infections.
- Describe the dangers of public misperceptions against vaccines.

REGISTRATION FORM

Cost: $285 for Dentists / $185 for RDHs and Aux. / U.S. Funds
$145 for Staff attending w/ Dr. (details in yellow burst on reverse side)

Refunds / Cancellation Dates: Please, no policy on reverse side. By registering, you agree to the Terms of Policy.

1.通過 the current infection control regulations for dentistry as reinforce-ment for clinicians of an effective, practical infection control program.
2. Understand the routine application of various infection control practices and protocols based on accumulated science- and clinical-based evidence and regulatory requirements.
3. Comprehend the variety of acceptable product choices for accomplishing a infection control goals in a dental facility.
4. Comprehend the historical and current challenges waterborne infections present to the population and healthcare facilities.
5. Understand the unique colonization and pathogenic properties of microorganisms that promote cross-contamination and infection in susceptible hosts.

Confirmations will be mailed to the address below: Home or Office of:

Home or Office Mailing Address

City / State / Zip Code

Payment Options:
- Check (make payable to: Concord Dental & Medical Seminars)
- Visa / MasterCard

Card #: ____________________________
Exp. Date: ____________________________
Please clearly complete the registration form to avoid delay.

Confirmations & Hotel Directions will be mailed 10 business days prior to the seminar.

Please clearly complete the registration form to avoid delay.

8 CEUS

“HEALTH, SAFETY, PROTECTION & INFECTION CONTROL IN THE DENTAL PRACTICE”

I. Let’s Talk About Infection Control

A. Current guidelines, recommendations overview & expo-sure control plan for dental practice - CDC, ADA, OSHA
B. Current Statistics - Hepatitis-C
C. Aseptic Techniques - hand hygiene
D. Post-Exposure Management Protocols

Coffee Break

E. Personal Protection Equipment Updates - goggles, eye-wear, masks
F. Instrument Sterilization & Processing
G. Environmental Surface Disinfection
1. Covers
2. Spray disinfectants
3. Disinfectant wipes
H. Dental Unit Waterline Aspesis

Lunch (12:30 - 1:00 pm)

II. The Challenges of Waterborne Infections

A. Waterborne diseases overview
1. Global impact
2. Infectious agents
B. Outbreaks and characteristics
C. Waterborne infections in health care
1. Medical outbreaks and sources of cross-infection
2. Representative pathogens
D. Implications for dental water sources

Dessert

III. Vaccine Recommendations

A. Public health impact
1. Vaccine principles and types
2. CDC recommendations
B. Discussion of representative vaccines
1. HBV, influenza
2. Zoster, HPV
C. Public Health Knowledge
1. Herd immunity
2. Mandated requirements
D. Science vs. vaccine myths
