ABOUT THE SPEAKER

Dr. Steven Bookless has been practicing for 35 years. His formal medical / dental education started at Cornell Medical School in the Surgeon's Assistant Training Program. Upon completion of the program Dr. Bookless joined the staff of The New York Hospital, New York Firefighters Burns Center. His duties at the center included the management of severely burned patients in the center's ICU step-down unit. In addition, Dr. Bookless first assisted on all major Operating Room cases, conducted research, published, and served as a senior technician in the center's skin bank. During his time at the burn center Dr. Bookless became interested in facial reconstruction of burn victims during a combined OR case in collaboration with the Oral and Maxillofacial Surgery Service at the hospital.

Dr. Bookless completed his dental education at The University of Texas Health Science Center at San Antonio. After graduation from UTHSC San Antonio he completed his Oral and Maxillofacial Surgery Residency at the University of Cincinnati and became an associate in a full scope oral surgery practice. He is a Diplomate of the American Board of Oral and Maxillofacial Surgery, Fellow of The American Association of Oral and Maxillofacial Surgeons and served as treasurer of the Rhode Island Association of Oral and Maxillofacial Surgeons.

In 2001 Dr. Bookless retired from private practice to pursue an academic career. Dr. Bookless retired from academic practice in 2020 and is currently focused on providing continuing education. Dr. Bookless and his colleagues taught medical emergency management to the dental students in a multi-million-dollar, state-of-the-art simulation lab at the medical center. His interests include outpatient surgery, sedation, management of medically compromised patients, and medical emergencies in an outpatient setting.

The speaker receives no support from any commercial organization and does not promote any commercial products or sell any tapes, books, instruments, forms or other materials for this course.

COURSE DESCRIPTION

This course is a practical case-based presentation designed to expose the participants to diagnosis and treatment of medical emergencies in the dental office. The course content will be geared to the capabilities of a general dental / hygiene practice. Topics will include creation of an emergency plan, staff responsibilities, communication techniques, emergency medical equipment and appropriate emergency drugs and their use.

LEARNING OBJECTIVES

Upon completion of this course, the participant will be able to:

- Create an office medical emergency protocol
- Describe the basic and specific emergency medical equipment and necessary drugs.
- Define the roles of the office staff in an emergency medical situation.
- Understand the common medical emergencies encountered in a dental office and their treatment protocols.
- Feel more confident and comfortable diagnosing and treating medical emergencies during a medical emergency.

Dr. Bookless' presentation is didactic lecture using a student handout and PowerPoint presentation. Case studies will be used to illustrate the diagnosis and treatment of the most common medical emergencies encountered in a dental practice. The presentation participants will be encouraged to actively participate in the critical treatment decision process.

Confirmations will be emailed two weeks prior to the seminar. Please provide a valid, unique email for all registrants attending. To reduce paper waste, we are no longer mailing paper confirmations.
