## • ABOUT THE SPEAKER •

Dr. Fluent began her dental career as an office-trained dental assistant and has worked in the role of most every dental team member. Dr. Fluent is a graduate of the University of Michigan School of Dentistry, she serves on the Board of Directors of the

Michigan Antibiotic Resistance Reduction Coalition (MARR) and was recently inducted into the American College of Dentists. With her unique perspective, Dr. Fluent connects with her audiences in writing, webinars, and invited lectures. Dr. Fluent is passionate and deeply committed to improving dental personnel and patient safety and has educated thousands of dental professionals and students nationally and internationally.

The speaker receives no support from any commercial organization and does not promote any commercial products or sell any tapes, books, instruments, forms or other materials for this course.

*“Dr. Fluent’s seminar will use a traditional Power Point lecture format that will include microbiological, research, and other evidence-based clinical information to demonstrate and reinforce concepts. The presentation will also encourage audience participation in the discussion of appropriate infection prevention strategies for clinical settings. Participants will have multiple opportunities to ask questions during the course of the seminar.”*

Rooms: Reserved at \$189/night until March 25.  
Use Group Code CDES when reserving.

## • TESTIMONIALS •

***What others are saying about this course/speaker:***

“Dr. Fluent was an excellent presenter. It is so refreshing to hear a strong advocate for employee and patient safety, just like we were trained in a military dental practice setting.”

*-Live Webinar Attendee*

“Dr. Fluent is very knowledgeable, her enthusiasm for the topic made it easy to stay engaged.”

*-Live Webinar Attendee*

“Thanks for making this painless!  
The best infection control I’ve had in years”

*-RDH Hunt Valley, MD*

“Loved the concise review—  
Always good, no matter how long we have been in practice”

*-Live Webinar Attendee*

“This was the most important course I have taken in the last 10 years!” *-Patrick R., DDS Freeport, ME*

“Dr. Marie Fluent was an excellent presenter.

Honest, clear & compassionate”

*-Diann C., RDH Freeport, ME*

“100% Best course I’ve attended. Dr. Fluent was excellent and I took a lot away from this.” *-Danielle, RDH Manchester, NH*

**Infection Control Updates & OSHA Annual Compliance Training for the Entire Dental Team (4 hrs)**

All clinical personnel in the dental setting are at risk for exposure to disease agents and other environmental hazards. With attention to infection control CDC Guidelines, risks to yourself, your patients, and other dental team members can be minimized. In this update, the scientific background behind infection control and safety regulations will be emphasized. Participants will be able to recognize strategies to break the chain of infection and prevent exposure to blood-borne pathogens and other infectious materials in the dental setting.

Dental professionals in the state of Michigan are required to comply with OSHA/MIOSHA Standards and to complete at least one hour of required continuing education in infection control per license renewal period. This course will satisfy both OSHA/MIOSHA requirements for annual training and Infection control updates required by the state of Michigan for re-licensure.

**Antibiotic Stewardship in Dentistry: A Team Approach (2 hrs)**

Antibiotic resistance is a major public health threat, with "superbug" infections occurring in 2.8 million people in the US each year. Antibiotic misuse and overuse are the primary reasons for the development of antibiotic resistance and Clostridioides difficile infection (C. Diff). When prescribing antibiotics the risks and benefits must always be considered

Antibiotic stewardship is the effort to measure and improve how antibiotics are prescribed by clinicians and used by patients. Appropriate antibiotic prescribing means prescribing antibiotics only when indicated. Stewardship efforts include the right antibiotic, the right dose, and the right duration.

In this program, the guidelines for use of antibiotics for prophylaxis and treatment in dentistry will be reviewed, challenges to responsible prescribing will be discussed. Attendees will be provided with numerous clinical tips, tools and resources for all dental team members to promote antibiotic stewardship in their own practice.

**Dental Unit Waterlines: It's time to Clear the Confusion! (2 hrs)**

Water is a vital component of modern dentistry and water supplied from the dental unit is used for most every routine dental procedure. Dental personnel are required to deliver water that meets drinking water standards but are often confused about why and how to deliver safe water. This webinar will discuss the importance of using clean and safe water, and guidelines and regulations for water quality. Dental team members will learn how to ensure compliance for the continuous delivery of safe water during dental care through routine maintenance, shocking and testing their waterlines.

**LEARNING OBJECTIVES**

*At the completion of this course the participants should be able to:*

- Understand the differences between CDC guidelines and OSHA Standards
- Describe the OSHA Bloodborne Pathogen Standard and other required OSHA documents
- Discuss the importance of a written office-specific infection control program and OSHA regulatory documents
- Discuss the importance of handpiece sterilization
- Understand PPE requirements for safe clinical care and for other tasks within the dental setting
- Describe how antibiotic resistance occurs and some of the most important antibiotic resistance issues
- Understand the impact that unnecessary antibiotic exposure has on patient harm including antibiotic resistance and Clostridioides difficile infection
- Review guidelines for management of odontogenic infections and guidelines for antibiotic prophylaxis
- Identify key antibiotic stewardship issues in dentistry and provide approaches and tools that may be implemented by all dental staff
- Describe how and why biofilms form in dental equipment
- Make evidence-based choices in the selection of waterline treatment products
- Identify guidelines, regulations, and best practices that impact dental unit water quality and compliance
- Discuss rationale and indications for testing dental unit waterlines

**TOPICS ADDRESSED INCLUDE:**

- Principles of Infection Control
- Microbiology, Disease Transmission, and Immunizations
- CDC Guidelines and OSHA Regulations
- The role of the Infection Control Coordinator
- Hand Hygiene
- Personal Protective Equipment, Respiratory Hygiene and Cough Etiquette
- Protocol for sterilization of handpieces
- Sharps Safety
- Special Considerations
- Dental Unit Waterlines
- Operatory Preparation and Waste Management
- Overview of the Concept of Antibiotic Stewardship
- Appropriate Antibiotic Prescribing
- Antibiotic Stewardship Guidelines in Dentistry
